

Telephone Privacy

I urge the FCC *not* to implement a proposal that might diminish Indiana's telephone privacy law.

I am sympathetic to the FCC's desire to provide some protection for people in states that do not have any telephone privacy law, but it would be a terrible shame if the commission's were to introduce a national standard that would lessen Indiana's telephone privacy protection.

Please do not pre-empt our excellent state law!

Sincerely yours,

Malcolm H. Brown
